

MOTUS USA M-RACING SERIES FUSION MODEL

M-Racing by Motus USA incorporates unique features like rear-wheel drive technology and triple-layer powder coatings for product longevity. The FUSION and NRG models boast a sleek racing silhouette, comfort handlebars and an ergonomic saddle. With an on-board computer and heart-rate monitor, users can enjoy instant access to real-time monitoring of statistics. Tension is easily adjusted using the patented Accujust™ feature. These Ferrari-style indoor cycles are well suited for every facility's image demands and performance expectations. *For more information, call 866-668-8766 or visit www.motususa.com.*

KEISER M3 INDOOR CYCLE

The new Keiser M3 indoor cycle is the result of over a decade of cycle development. Every single component, from the handles to the base, has been scrutinized and quality-tested. The true hallmark of the M3 is its durability; the M3 is constructed of corrosive resistant materials, has a resistance system that doesn't wear and is virtually maintenance free. It requires less work to keep it running. The M3 offers a smooth feel, whisper-quiet ride and ease of use. *For more information, visit www.keiser.com or call 800-888-7009.*

STRIVE VCYCLING™

VCycling brings the road to indoor adult and youth group cycling classes, as well as individual cyclists. Users can select a scenic journey through Italy or ride the Tour de France while competing against themselves or other cyclists in a racing format. *For more information, call 800-368-6448 or visit www.strivefit.com.*
